Multi-Factor Authentication (MFA) Setup and Recovery

Document ID: KB-003 | Owner: Fabrikam IT Help Desk | Last reviewed: 2026-09-01

Overview

Every Fabrikam account requires multi-factor authentication. Fabrikam uses the Fabrikam Authenticator app. Sign-in prompts use number matching: you type the number shown on the sign-in screen into the app.

Set up MFA on a new phone

1. Install Fabrikam Authenticator from your phone's app store.
2. Go to https://mysignins.fabrikam.example and choose Add sign-in method.
3. Scan the QR code with the app.
4. Approve the test prompt.

Changing phones

Move your account to the new phone before you reset the old one. In the old app, choose Transfer accounts and follow the steps on the new phone.

Backup codes

Each user can create 10 single-use backup codes at https://mysignins.fabrikam.example. Store them in a safe place. Each code works once.

Lost or stolen phone

Raise a ticket right away. The help desk can issue a Temporary Access Pass that is valid for 8 hours so you can register a new phone. Your manager must confirm the request.

If the steps fail

Raise a ticket in category MFA. For a lost phone use priority High. Response targets: Critical 1 hour, High 4 hours, Medium 1 business day, Low 3 business days.
