Reporting Security Incidents and Phishing

Document ID: KB-010 | Owner: Fabrikam IT Security | Last reviewed: 2026-09-01

What to report

Report suspicious emails, clicked phishing links, malware warnings, and lost or stolen laptops or phones. Report within 1 hour of noticing the problem.

Phishing email

1. Do not click links or open attachments.
2. Use the Report Phishing button in Outlook.
3. Do not forward the email to anyone.

You clicked a link or opened an attachment

1. Disconnect from Wi-Fi or unplug the network cable.
2. Do not turn off the laptop.
3. Raise a Critical ticket in category Security or call the IT Security line on extension 4000.
4. Change your password from another device after IT Security tells you it is safe.

Lost or stolen device

Report it within 1 hour. IT Security locks the device remotely and removes company data.

Response

IT Security responds to Critical tickets within 15 minutes. Do not delete evidence such as the suspicious email.

If the steps fail

Raise a ticket in category Security with priority Critical. Response targets: Critical 1 hour, High 4 hours, Medium 1 business day, Low 3 business days.
